# CLIENT TESTEMONIALS

**Asiedu Samuel**

"The level of sophistication of your solution, the short time within which it was developed and its impact on our bottom-line, is quite impressive, considering how affordable your rates are in comparison with foreign and other local

**Prince Dela Awunyoh**

"Your two developers assigned to us: A. and S. have been of tremendous help in the restoration of our customers' trust in our bundles and other products and services."

**Alfred Neequaye**

"The work output of your engineer E.O must be commended for its timeliness and quality "

**Sandra Adusah**

"The Development Proceess for your software service is commendable."

# OUR MANAGEMENT TEAM

**Kofi Amparheng**  
Managing Director

## Description

Kofi, as the founding managing director of ACS has been instrumental in nurturing an environment of innovation and best practices. This has led to customers from across Africa and the Middle East expressing a vote of confidence in the wares of the company by way of continuous business and referrals.

Prior to joining ACS, Kofi was the development and integration manager at MTN Group where he oversaw the planning, organization, execution and transitioning into production of the customer and business facing applications software for MTN Group.

**Richmond Amponsah**  
Administration Manager

## Description

Richmond holds a Bachelor of Science degree in Economics and Business Administration from the Catholic University College of Ghana, a member of the International Institute of Business Analysis and over 7 years experience in financial accounting, Business Analysis, and system support.

He has held many positions within the company that bring to bear the wide range of skillset he brings to the business. From Sales Officer, he took additional role as Accounts Officer. Following with a changeover into his new role as the Support Officer seamlessly and performing admirably well.

His long and varied service enables him to contribute immensely to steering the business strategy and performance as the Administration Manager.

Richmond has demonstrated exceptional leadership in hiring, training top talent, and evaluating administrative team members. Developing, reviewing, and improving policies, strategies, and procedures to streamline processes and systems.

# OUR MANAGEMENT TEAM

**Nana Kofi Aferi**

Project Delivery Manager

## Description

Nana Kofi Aferi, has deep working knowledge and experience in Mobile Application Development, Web, Systems Administration, and emerging technologies.

He has proven ability to conceptualize code, test, and render creative and simple solutions for mobile and web. Analytical thinker that consistently resolves ongoing issues or defects, often called upon to consult on problems that have eluded resolution by others. Good understanding of mobile, and web application development, software standards, software development life cycle and methodologies. Self-motivated and have the drive to work on rapidly changing requirements to meet end user needs. Reliable and efficient in working with medium to large scale teams.

Nana Kofi has worked with Meltwater labs, where he was mainly involved in architecting, managing mobile data persistence, writing tests, and implementing UI designs for some of their mobile applications. Nana Kofi was the Lead Android Developer for the Suba app(an app that lets you create fun, location, and event-based social spaces where everyone can share their photos and get to know each other.), which won the Mobile West Africa 2015 App Developer Competition.

Nana Kofi has very good problem-solving skills and has a likeable personality. And he is also a martial artist and loves cycling

**Smuel Anang**

Customer Operations Manager

## Description

Since joining Adaptive Computer Solutions Ltd in 2017, Samuel's dedication, competence, and desire to build a career in IT has been remarkable.

With a background in Computer Science, his career took off with him as a fine software engineer and then transitioning into IT Service Delivery and Management where he played a pivotal role in the creation of policies, procedures and the technical capacities required for a dedicated Technical Operations and Support team which he led.

In his current role as the Customer Operations Manager, Samuel Anang, has been responsible for operations initiatives and strategies that ensure the successful implementation, support and continuous improvement of customer facing systems, and processes to strengthen the customer experience and the overall effectiveness of Service Delivery and Management for major clients – MTN Ghana, MTN Liberia & MTN Afghanistan.

# OUR MANAGEMENT TEAM

**Emmanuel Owusu**

Engineering Development Manager

## Description

With over 6 years' experience in software development under his belt at ACS, Emmanuel as Lead software engineer and later Engineering manager, has been dedicated to personally developing and overseeing development of secure, high-value, high-complexity programs for critical customers like MTN Ghana. Now as Engineering Development Manager, he conducts research and analyses together with fellow experts, develops drafts and prototypes, creates, and establishes test systems, troubleshoots issues, and sets guidelines for software engineering.

His work includes notable achievements like empowering the engineering teams to reach goals and implementing quality and innovative standards and regulations for a safe and efficient workflow. His fine work has received many testimonials from top-ranking officials from telecom and the aviation industry.

Emmanuel is PMP and AWS certified and holds a BSc Degree in Information Technology from the University of Cape Coast.

**Alfred Neequaye**

Engineering Development Manager

## Description

starting off in the Software Development field right out of school, Alfred has been steadily improving and always learning over the years.

At ACS he's gradually risen thru the ranks from Junior Engineer To Lead Engineer then finally to his current position as General Manager Development Services due to his strong zeal and passion for the Software Development in all shapes and forms.

Since joining in 2017 he's been very instrumental in the management and handling of one of ACS's high value client MTN LCC. Over the years he's been one of the driving forces in the company to modernize our development stack and tools to keep the company very competitive and at the forefront and major technological advancements our dev fields. From the introduction of containers to the improvement made on the devops practices at ACS.

Alfred has always been there to champion the best paths to take in the improvements to infrastructure and Application Development.

He's a BSc. Computer Science Degree Holder at University of Cape Coast.

Fourth St. K. Asante Avenue, West Legon, Accra.
